READY MIXED CONCRETE, MORTAR & SCREED

Mansfield's first drive-thru solution for ready mixed Concrete, Mortar and Screed – Mansfield Sand SpeedyMix.

Our state-of-the-art drive-thru collection facility, located at Crown Farm Industrial Estate Mansfield, is an exciting and revolutionary solution, perfect for local builders, civils contractors, landscapers, and DIY enthusiasts in the local Mansfield area who require small to medium loads of ready mixed concrete, mortar, or screed.

Mansfield Sand SpeedyMix is a fully automated self-service batching plant that brings unprecedented convenience, allowing our customers to collect the exact amount of ready mixed concrete, mortar or screed they need either directly into the back of a vehicle body, trailer or into our handy tubs, with just the push of a button.

With orders starting as little as 0.25m³, Mansfield SpeedyMix eliminates the need for customers to spend time mixing themselves on-site, waiting at local ready-mix plants, or dealing with minimum order delivery charges and waste disposal problems.

Small loads of under 0.8m³ concrete, mortar or screed can be mixed and poured in under five minutes, saving you valuable time and resources. Our cost-effective, environmentally friendly, and adaptable solution can produce up to 16m³ an hour.

The collection of our concrete, mortar, and screed is hassle-free, and convenient – just like using a vending machine or a fast-food drive thru!

No need to book, with handy one-tap card payment at the order terminal.

INDUSTRIAL

READY MIXED CONCRETE, MORTAR & SCREED

Why choose Mansfield Sand SpeedyMix?

- Cost effective – only pay for what you require (no minimum 1m³ charge!)
- Time-saving – mixing and pouring cycle under 5 minutes.
- Hassle-free – turn up and collect, no need to book.
- Automated mixing technology – cutting-edge control panel ensures all recipes are high quality and consistent.
- Order what you need – from as little as 0.25m³
- Fast & Efficient – Our machine can make up to 16m³ an hour.
- Dynamic mixes – options include various concrete, mortar, or screed recipes tailor made to your specific application
- Adaptable – collect on the back of your van body, trailer or using a mortar tub
- Environmentally friendly – our solution is less wasteful as the exact quantities of materials are weighed in every time
- Longer Life – Specially formulated mix with up to 48 hours extended workability for your convenience (with retardant added)

THE PROCESS

OUR 4-STEP COLLECTION PROCESS IS SIMPLE:

- 1 Drive in and follow the directions to position your vehicle or tub under the conveyor belt
- 2 Select your required product at the touch screen terminal & scan your payment card
- 3 Start mixing and pouring
- 4 Drive away with your freshly served product

The system is designed to be speedy and simple, but rest assured, our helpful staff are on hand to provide you with any assistance or advice you need.

Recipe Variety

The dynamic nature of Mansfield Sand SpeedyMix means we can offer a variety of standard and bespoke recipes for concrete, mortar, or screed. The solution gives customers control over the workability of their material providing more flexibility.

Retarder is an additive that can be combined with mortar to slow down its setting time to make its workability last longer.

Air entrainer can be added to increase the amount of air trapped in the mortar, making it more workable and giving more frost protection.
