FINE TURF RANGE

**Sterilised Top Dressing**

Produced for the fine turf market, our Sand Soil Top Dressings are a quality product you can rely on. A manufactured homogenous product made from our own premium silica sands combined with top quality soils. All passed through our sterilising unit, over a 3mm screen to produce an easy to spread, stone and pebble free dressing.

- Standard blends: USGA 70/30 80/20

We can also produce bespoke dressing blends and combine soil amendments into any product upon request. Please enquire about this service.

- Applications:
Surface and aeration restoration dressing.
- Available loose and 25kg and in bulk bags.

Moist Mansil Golf

Our premium sand turf dressing, washed and graded as a medium sand to meet the demands of the fine turf sports industry. Used as part of a

regular maintenance programme or as an infill sand after intensive aeration procedures.

- Available loose and in bulk bags.

Moist Mansil Bunker

Based on our popular Mansil 35 silica sand it is the perfect bunker sand which is compatible with all our dressing products, so no need to worry about sand splash over the playing surface.

- Available loose and in bulk bags.

Mansfield Divot Fill

Our Mansfield Divot Fill has been specially developed to aid the quick re-establishment of playing surfaces, whilst providing the underfoot stability required for tees and fairways. Using our own Mansil 40 grade medium sand combined with our quality compost it is the obvious choice for divot repair.

- Available loose and in bulk bags.
